MASTER FILL
LATEX CEMENT CRACK FILLER FOR CONCRETE

PREVENTIVE MEASURE:
Small cracks in old and new concrete can lead to crumbling, breaking, alligating, upheaving and the formation of chuck holes. If not quickly mended, even the smallest crack can let harmful moisture and water into the foundation below concrete.

CAUTION

SEALS OUT MOISTURE
PREVENTS DETERIORATION
PERFECT ADHESION
ELASTIC DURABLE BOND
EASILY APPLIED

DOUBLES AS A CONCRETE JOINT FILLER WHEN SPEED IS IMPORTANT

EACH CAULK TUBE COVERS 24 LINEAR FEET AT 1/4" WIDE BY 1/4" DEEP

WARNING: KEEP OUT OF REACH OF CHILDREN

DIRECTIONS
Clean out cracks of all loose dirt, stones, etc. Apply only when area is dry and when temperatures are over 40° F. In cold weather, store in warm room 24 hours. Protect newly sealed cracks with sand or heavy paper to avoid tracking for 24 hours. Apply with trowel or putty knife. For cracks over 1/8 inch wide, fill slightly higher than surface desired to allow for slight shrinkage. For neatest appearance, smooth with clean trowel or putty knife. Use on cracks or joints no larger than 1/4" wide by 1/4" deep.
