POLAR PELLETS
SNOW AND ICE MELTER

CAUTION
PLEASE REFER TO THE MSDS SHEETS FOR MORE DETAILED PRECAUTIONARY MEASURES, HANDLING INSTRUCTIONS AND EMERGENCY PROCEDURES. Contains Calcium Chloride can cause severe irritation to eyes, with possible corneal injury, irritation to skin and possible superficial burns - avoid contact by wearing protective clothing and washing thoroughly after using. Dusts may irritate eyes, nose, throat, and respiratory tract - avoid inhalation of dust. Ingestion can cause burns to mouth.

FIRST-AID
EYES: flush with copious amounts of water lifting lids and removing contact lenses to ensure complete irritation - get medical attention. **Note to physician** stain eyes for corneal injury. If cornea is burned instill antibiotics steroid preparation frequently. SKIN: flush with water and wash with soap and water, launder contaminated clothing before reuse - get medical attention if irritation persists. INHALATION: remove to fresh air and assist breathing as necessary - get medical attention. INGESTION: INDUCE VOMITING by giving several glasses of water and sticking finger down back of throat - get medical attention.

Use POLAR PELLETS to immediately melt snow and ice from parking lots, sidewalks, stairways; anywhere ice and snow constitute a hazard.

- GENERATES ITS OWN HEAT TO MELT ICE AND SNOW IMMEDIATELY
- WORKS 20-30 TIMES FASTER THAN SALT
- LEAVES NO WHITE RESIDUE TO TRACK
- WORKS TO -50° F (-46° C) WHERE ROCK SALT DOES NOT WORK AT TEMPERATURES LESS THAN 25° F (-3.8° C)
- REMAINS ACTIVE TO MELT ONCOMING SNOW
- WILL NOT PIT OR ETCH CONCRETE

AVAILABLE SIZES
- 2.5-GALLON UNIT - UP TO 2,000 SQUARE FEET
- 5-GALLON UNIT - UP TO 4,000 SQUARE FEET

WARNING: KEEP OUT OF REACH OF CHILDREN

DIRECTIONS
Sprinkle lightly and evenly over ice surface, about 2 lb. per 200 sq. ft. (1 coffee can holds about 2 lb). Thawing begins immediately. As soon as ice is melted, slush and water should be promptly removed to prevent refreezing. The cycle of refreezing and thawing by natural weather elements can cause damage to concrete. The use of an ice melting agent increases these cycles and are factors over which we have no control. If this product is used on concrete of questionable quality, or in excessive amounts, there may be flaking and scaling of the concrete surfaces. When grass and shrubbery are adjacent to ice surface, particular care should be used to avoid excessive application as it could cause browning. The use of this ice melting compound must be at the consumer's risk.
