EM STRIP GEL IS A THICKENED, NON-CHLORINATED STRIPPER FORMULATED TO PROVIDE EFFECTIVE REMOVAL OF CURED PAINTS, EPOXIES AND URETHANE MATERIALS. THE VISCOSITY OF EM STRIP GEL HAS BEEN INCREASED TO PROVIDE BETTER RETENTION ON VERTICAL OR UNEVEN-surfaces.

- NON CHLORINATED
- PLEASANT CITRUS SCENT
- LOW VOLATILITY

INHALATION - remove to fresh air and assist breathing as necessary - get medical attention. Skin: immediately wash with large amounts of soap and water - remove and launder contaminated clothing before reuse - get medical attention if irritation persists after washing. Eyes - flush with water for at least 15 minutes - if irritation persists get medical attention. Ingestion - dilute with water immediately. Never give fluids if victim is unconscious or having convulsions. Contact a physician immediately.

DIRECTIONS
The EM Strip Gel is used as received. It can be applied by brush, roller or spray to floors, walls, ceilings or different types of molds. The viscosity will allow the chemical to stay in contact with the coating for an extended period of time. Depending upon the type of material being removed, the thickness of the material and the application temperatures, removal time will vary.

If, when checking on the status of removal, the stripper is still evident and the material is not yet removed, allow more dwell time. If the stripper seems to have soaked into the material, then remove as much material as possible by scraping, wiping or water rinse and, when dry of residual water, apply another coat of stripper.

NOTICE
In extreme fire conditions, this material may present a floating fire hazard. Concentrated vapors can be ignited by a high intensity ignition source.

AVAILABLE SIZES AND COVERAGE
- 1-GALLON UNIT - 12.5 FT X 12.5 FT AT 10 MILS THICKNESS
- 5-GALLON UNIT - 62.5 FT X 62.5 FT AT 10 MILS THICKNESS

WARNING: KEEP OUT OF REACH OF CHILDREN
